**MOBILE SCAFFOLDS, LASER HIRE, TRESTLES & PLANKS**

June 2006

For many years Action Scaffolds used a manual hire docket system. It was sufficient to get the job done initially but as we developed into a multi-branch business with our affiliated company Action Access, it required many hours of tedious labour to complete monthly billing, there was a lack of stock control and we were unable to determine the turnover of each branch. With company expansion it was inevitable that a move to a computerised hire management program was the only way to maintain a modern, professional approach whilst giving the company more control.

After months of searching for the best hire management system on the Australian market and not being completely satisfied with any, Software Link finally introduced us to Syrx. Syrx encompassed everything that we required and was suitable for further expansion in the company. It was an easy to use, progressive program that gave us a professional image.

We have had Syrx installed for just under three months now and are very pleased with the performance of this program. It is not often that you can implement a system and have it work from day one. Syrx does everything that we were informed it would do. The windows based technology makes for such easy use. We can view both companies on the one screen and each branch can operate independently with reports being produced for either or both branches. We can keep track of cross hired equipment, control our stock and produce service reminders. The integration with MYOB has meant very few changes for our back office staff and for general account reporting.

Software Link has provided us a very invaluable tool for our business and we look forward to working with them as our business grows into the future.

Kind Regards
