To Whom It May Concern

Rapid Access Australia has been dealing with Software Link for the past 3 years. In this time Software Link has provided outstanding customer service and technical support with the program we purchased for our Access Hire Company.

Rapid Access Australia has been using the access hire program called Syrinx. As a busy Access Hire Company we find this system accommodates all of our specific day to day needs, ranging from transport movements, to hire, to stock control. Syrinx also offers a wide range of Reporting features.

Rapid Access Australia is happy to recommend Chris and King from Software Link to any customer thinking of using their services.

If you wish to contact me for a verbal recommendation please don't hesitate to contact me on the listed numbers below.

Regards,

*Callum Manderson*
